RE: Junior Application Developer

To Whom It May Concern:

I recently came across your Junior Developer position ad on the Olympic Training center website. I have attached my resume for your review and consideration. I have approximately 2 years' experience in IT from my time spent working at the University of Colorado while completing my bachelor's in computer science degree. Throughout my time at the university as a student and employee, I was often commended by teachers and staff for my communication, teamwork, and unique perspectives to others in the computer science department. Now that I have graduated, I am ready to dive headfirst into the field to explore any and all aspects to gain deeper understandings of the wide range of areas that the computer science and development fields hold.

I have always been a sports enthusiast and team player. After an injury last year, I have been coaching the University of Colorado's club rugby team at Colorado Springs which will allow me to complete the Safe Sport training with confidence. I am excited about the possible opportunity to begin a journey into the sport of wrestling with you all as well.

From my classes and projects at college, I do have experience with different forms of software life cycles and project management having led several teams during my time there. I also was able to experiment with AWS for a semester as well, leaving me with some knowledge of Cloud environments.

I thank you in advance for your consideration of my talents for this position and hope to hear from you soon.

Sincerely,

Noah Holt
